Objective

Software Engineer with 2+ years of experience in developing and maintaining SaaS-based web applications using PHP, CodeIgniter, Laravel, MySQL, JavaScript, HTML, and CSS. Experienced in developing enterprise applications across Administration, SIMS, HRMS, LMS, and business management modules, with hands-on experience in multi-tenant application development and Jenkins-based CI/CD deployment workflows. Skilled in backend development, RESTful APIs, database optimization, application deployment, and software troubleshooting. Passionate about building scalable, maintainable applications and continuously expanding expertise in modern web technologies and DevOps practices.

Experience

Software Engineer **Sept 2025 – Present**

Resbee Infotechnology

- Developing and enhancing the SaaS-based School ERP platform **eKhool** using PHP, CodeIgniter, JavaScript, and MySQL.
- Designing and maintaining scalable backend modules for Administration, SIMS, HRMS, LMS, finance, examinations, attendance, and reporting.
- Optimizing application performance through efficient database design, query optimization, and code refactoring.
- Working with RESTful APIs and third-party integrations to extend application capabilities.
- Configuring and maintaining **Jenkins CI/CD pipelines** to automate application build, deployment, and release workflows.
- Supporting automated deployments across development and production environments and troubleshooting deployment-related issues.
- Working with **Git/GitLab** for version control, branch management, code integration, and release workflows.
- Collaborating with QA, UI/UX designers, and product teams to deliver reliable and production-ready software releases.
- Mentoring junior developers and participating in technical discussions, code reviews, and sprint planning.

Junior Software Engineer **Sept 2024 – Sept 2025**

Resbee Infotechnology

- Developed and maintained modules for the SaaS-based School ERP product **eKhool** using PHP and the CodeIgniter framework.
- Designed and optimized MySQL database queries to improve application performance.
- Implemented new features, fixed production issues, and enhanced existing functionalities.
- Integrated REST APIs and collaborated with cross-functional teams to deliver scalable solutions.
- Participated in code reviews, testing, and deployment activities while following coding standards.

Web Development Intern **May 2024 – Sept 2024**
Resbee Infotechnology

- Assisted in developing and maintaining web applications using PHP, HTML, CSS, JavaScript, and MySQL.
- Worked on bug fixing, database management, and feature enhancements.
- Learned and implemented MVC architecture using the CodeIgniter framework.
- Collaborated with senior developers to understand software development best practices.

Research and Development Engineer **Sept 2022 – May 2024**
Thomas Aero

- Designed and developed innovative product concepts and detailed engineering plans.
- Conducted prototype testing to validate designs against performance and quality standards.
- Maintained comprehensive documentation of research findings and test results.
- Mentored interns on design and analysis methodologies.

Projects

SaaS School & College ERP Platform
Student Information Management System (SIMS) – Ethiopia

- Contributed to the development and maintenance of an Ethiopia-based **Student Information Management System (SIMS)**, a SaaS School & College ERP solution integrated with the **eKhool Learning Management System (LMS)**.
- Developed and enhanced backend modules using **PHP**, **CodeIgniter**, **MySQL**, JavaScript, HTML, CSS, and jQuery.
- Implemented and maintained features for the **Human Resource Management System (HRMS)**, including employee management, leave management, payroll-related workflows, and staff records.
- Worked extensively on the **Administration** module by implementing user roles, permissions, access control, system configuration, and organizational settings.
- Developed and maintained the **School Information Management System** modules, including student enrollment, academic management, attendance, examinations, fee management, and reporting.
- Optimized database queries and improved application performance to support a large multi-school SaaS environment.
- Integrated RESTful APIs and collaborated with cross-functional teams to deliver new features, resolve production issues, and ensure application stability.
- Participated in debugging, code reviews, testing, deployment, and continuous enhancement of the platform following software development best practices.

Laravel Web Application
Gym Management System – Multi-Tenant SaaS

- Developed a **multi-tenant Gym Management System** using **Laravel**, PHP, MySQL, JavaScript, and Tailwind CSS.
- Implemented tenant isolation, authentication, role-based access control, and gym-level data management.
- Developed modules for gym administration, member management, subscriptions, attendance, and payments.
- Configured **Vite** for frontend asset management and implemented **Jenkins CI/CD** for automated application deployment.
- Managed source control using **Git/GitLab** and handled environment configuration, database setup, and deployment troubleshooting.

Technical Skills

Backend: PHP, CodeIgniter, Laravel

Frontend: HTML, CSS, JavaScript, jQuery, AJAX, Tailwind CSS

Database: MySQL

APIs: RESTful APIs, Postman

DevOps: Jenkins, CI/CD, Git, GitLab

Build Tools: Vite, NPM

Concepts: MVC Architecture, Multi-Tenant SaaS, REST APIs, Authentication, Role-Based Access Control

Tools: Git, GitLab, Jenkins, VS Code, PhpMyAdmin, Postman, LaTeX

Engineering: CATIA, ANSYS

Education

Aeronautical Engineer **2018–2022**

Hindusthan Institute of Technology
Bachelor of Engineering

CGPA 8.2

Languages

Tamil (Native), English (Professional), Malayalam (Working), Hindi (Basic)
